

I-New signs contract with US giant Sprint.

The multiple industry awarded technology solutions provider signs cooperation contract with leading US communication services company Sprint to better serve the US MVNO market.

Mattersburg, Austria. April 2017.

I-New Unified Mobile Solutions is one of the fastest growing technology solutions providers in the digital communication industry and is a leading provider of MVNE services over lightweight BSS supporting MNOs and MVNOs successfully.

The company recently signed a cooperation contract with US communication services giant Sprint (NYSE:S) in order to provide enablement services to the North American MVNO market. Sprint serves around 60 million connections and is widely recognized for developing, engineering and deploying innovative technologies, including the first wireless 4G service from a national carrier in the United States; leading no-contract brands including Virgin Mobile USA, Boost Mobile and Assurance Wireless; instant national and international push-to-talk capabilities and a global Tier 1 internet backbone.

In recent years, I-New became a preferred business support partner of established Network Operators to enable the digital business transformation over lightweight and full digital Business Support Solutions. In cooperation with leading MNOs such as Telefonica Móvil, Tigo, Spark, Hutchison Telecom, Entel or Telenor the company already operates digital service hubs across the globe successfully and reinforces MNOs ability to transform or launch MVNOs or b-brands swiftly. I-New helps MVNOs gain additional market share, pass regulatory or market based challenges and – most important – to unleash from cumbersome, inflexible and expensive legacy systems. In this way, I-New ensures full digitalization of the subscriber experience and service management quality through highly competitive and award-winning products and services at a fraction of legacy system costs.

About I-New

I-New Unified Mobile Solutions is one of the fastest growing technology solutions provider in the digital communication industry. With offices and service hubs across the globe, the Austria based company is capable of providing, implementing and running state-of-the-art products and services for successful digital business transformation over next generation platforms. I-New's comprehensive module system of highly competitive products and services enable the full digitalization of most modern communication and transaction models. Multiple awarded as Best MVNO/E Solutions and Best Services to Telecoms from the global mobile and communication industry.
